PROFESSIONAL SUMMARY

- Full-stack developer with production experience building backend systems in **Node.js** and **NestJS**.
- Maintain **15+ REST APIs** in production at **Electrify Services**, a live system serving real users daily.
- Design **microservices architecture** with **WebSockets** and **JWT authentication** for secure, real-time systems.
- Independently handle **production support for 3 live projects**, triaging and resolving bugs end-to-end.
- Own the full deployment pipeline end-to-end, from **PostgreSQL** schema design to **AWS** infrastructure.

SKILLS

JavaScript, TypeScript, Node.js, NestJS, PostgreSQL, Prisma ORM, MongoDB, React, REST API Development, Microservices Architecture, WebSockets, Socket.IO, JWT Authentication, AWS (ECR, ECS), Docker, CI/CD, Razorpay Payment Gateway, Leaflet.js, Git

WORK EXPERIENCE

Full-Stack Developer (Intern to Full-time), Electrify Services **Nov 2024 - Present**
Ahmedabad, Gujarat

- Engineer and maintain **15+ backend REST APIs** using NestJS and PostgreSQL for a live production system, ensuring high availability and reliability.
- Replaced 5-second polling with WebSockets, cutting data update latency to **under 1 second**.
- Automated CI/CD deployment on AWS (ECR, ECS, Docker), cutting deployment time by approximately **70% (25 min to 5-7 min)**.
- Lead API design decisions and drive production debugging efforts within a 2-3 person team, strengthening feature delivery and system reliability.
- Built an internal **HR Resume Scanner** tool (FastAPI + React) that automates resume-to-job-description matching, replacing manual recruiter screening with TF-IDF-based ranking (scikit-learn) over PDF/DOCX/TXT input.
- Deployed a **self-hosted CI runner**, eliminating GitHub Actions' 2,000 min/month cap and removing a recurring infrastructure cost for the organization.

Flutter Developer Intern, JVS Technology Pvt. Ltd. **Jun 2024 - Nov 2024**
Ahmedabad, Gujarat

- Built cross-platform apps (Jain Library, Koba Library) enabling **200+ users** to search, read, and download books.
- Raised document-scanning accuracy to **95%+** on ORC, a document scanning application.
- Shipped **10+ features** biweekly alongside a small development squad, mentoring a junior intern on Flutter state management in an agile environment.

PROJECTS

Food Delivery App
Live Link | GitHub

- Architected a **5-service microservices** food delivery platform (Auth, User, Order, Delivery, Restaurant) behind a centralized API Gateway with **JWT authentication**.
- Established real-time order tracking with WebSockets (Socket.IO) and an interactive Leaflet.js map, refreshing live location **every 3-5 seconds**.
- Integrated **Razorpay** payments and designed a PostgreSQL schema (Prisma ORM, Neon) handling **1,000+ records** at **<100ms** average query response time.

EDUCATION

Bachelor of Engineering - Computer Science, Babaria Institute of Technology **Jun 2020 - May 2024**
CGPA: 8.28

Higher Secondary, Sett RJJ High School, Valsad **2020**
69%
